

1. Print out the following pages on heavy white card stock to make labels for cookie jars. When printed at 100% (actual size) they will fit 2 gallon glass jars perfectly. For smaller jars, simply reduce the scale of the print size in your print settings.
2. Cut out each rectangle then use a decorative edge punch (or scalloped scissors) to punch along the top and bottom edges.
3. Use an X-acto knife or craft knife to cut a small slit along the vertical lines. Cut a piece of ribbon slightly longer than the diameter of the jar. Thread the ribbon through the small slits in the sign.
4. Wrap the ribbon and sign around the jar and use hot glue to adhere it to the jar.
